- Fireplace/wood burner in use during child care hours? No Yes If yes, describe barriers to protect children from burns.
The fireplace on the main level is not used during child care hours. The wood burning stove is used during child care hours and the entire section of the room where it is located is gated off with a child safety gate. The gate is far enough away from the wood burning stove to prevent burns.

III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my onsite inspection I observed free play, outdoor play and hand washing. Interactions between child care staff members and child care children were positive.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1945 Emergency; plan; drill.

(1) An applicant or licensee shall have a written emergency response plan for the care of children that must be posted in a conspicuous location within the child care home.

The plan must address the following types of emergencies:

(d) Water emergencies, if applicable.

Ms. Ruwersma did not have a water emergency plan posted as required as there is a pool located in the backyard of this child care group home.

IV. RECOMMENDATION

I recommend issuance of a regular child care license to this group home (capacity 7-12).
