III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records.

Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

At the time of the onsite inspection, Ms. Jensen was present with one child care staff member and 10 child care children. Ms. Jensen's son, who is over the age of 6, was present in the upstairs of the home. The children were playing outside throughout the time I was present. They were engaging in free play with the various pieces of play equipment available and Ms. Jensen go out sidewalk chalk for them. I observed positive interactions between the adults and children, and appropriate supervision was provided.

The facility is in compliance with all applicable rules and statutes.

During the exit conference, technical assistance/consultation was provided regarding the following:

- Ms. Jensen had an outdated copy of the CPSC recall list posted. She will print and hang the updated copy.
- The locks under the kitchen sink were not secure. Ms. Jensen will secure those locks.
- A play house in Ms. Jensen's yard had cracked plastic. She will repair this or dispose of the equipment.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care group home (capacity 7-12).
