III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct

observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

When I arrived for the onsite inspection, Ms. Cummins and one child care staff member were present with five child care children. They were just finishing up table time. I also observed free play. Child care staff member, Elizabeth McMann, engaged well with the children during their free play. I observed Ms. Cummins and Ms. McMann to interact positively with the children and provide appropriate supervision.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1932 Home maintenance and safety.

(2) All dangerous and hazardous materials or items must be stored securely and out of the reach of children.

Ms. Cummins did not ensure that dangerous items were stored securely and out of reach of children. The kitchen drawer containing sharp knives had a broken safety latch.

A corrective action plan was requested and approved on 03/13/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

During the exit conference, technical assistance/consultation was provided regarding the following:

- I will email Ms. Cummins the link to the 2022 Health and Safety Refresher Course.
- Reviewed parent permission requirements for medications, transportation, and field trips.
- Ensuring child information cards and child in care statements are completed fully prior to children's first day of care.
- Replacing smoke detector batteries in the basement.

IV. RECOMMENDATION

I recommend issuance of an original license to this child care group home (capacity 7-12).
