III. DESCRIPTION OF FINDINGS & CONCLUSIONS

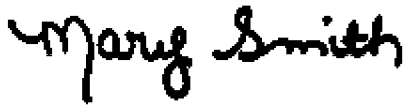

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

I observed the caregivers providing direct supervision of the children during free play time upon arrival. The children were playing with age-appropriate toys. I also observed hand washing and snack time. I observed the caregivers, parents, and children during drop off and pick up time. The children appeared to be happy and well bonded to the caregivers. The home was clean and safe for child care use.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license the group child care home (7-12).
