### III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

I observed Ms. Bright providing direct supervision of the children resting during rest time. The children appeared to be happy and well bonded to Ms. Bright. The home was clean and safe for child care use. Required documents were organized and readily available.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

**R 400.1933                      Water supply; sewage disposal; water temperature.**

(4) Hot water temperature must not exceed 120 degrees Fahrenheit at water faucets accessible to children.

Ms. Bright failed to ensure the hot water temperature did not exceed 120 degrees Fahrenheit at water faucets accessible to children.

A corrective action plan was requested and approved on 06/09/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

**Technical Assistance and Consultation were provided on the following:**

- I provided guidance on R 400.1925
- I provided guidance on R 400.1936(5)
- We discussed the process in completing a modification to remove space approved for child use.

#### IV. RECOMMENDATION

I recommend issuance of a regular license to the child care group home.
