### III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the on-site inspection, I observed child care staff members provide direct supervision to children in care while engaged in free play activities, bathroom, naptime, educational learning on television. I also observed parent pick-up and drop off. Child care staff members' interactions with children in care were positive, nurturing and age appropriate. Children in care were well-bonded to child care staff members.

The facility is in compliance with all applicable rules and statutes.

### IV. RECOMMENDATION

I recommend issuance of an original license to this child care group home (capacity 7-12).
