III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records.

Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1944 Smoke detectors; fire extinguishers.

(1) Operable smoke detectors approved by a nationally recognized testing laboratory must be installed and maintained on each floor of the home, including the basement, and in all sleeping areas and bedrooms used by children in care.

During the on-site inspection, I observed there to not be an operable smoke detector on the upstairs (2nd level of the home).

A corrective action plan was requested and approved on 01/23/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular license to this childcare group home (capacity 7-12).
