III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1918 Medication; administration; procedures.

(2) Medication, prescription or nonprescription, must be given or applied only with prior written permission from a parent.

The provider was only getting a blanket "as needed" signed permission form from parents for administering "orajel." Since orajel is an oral non-prescription medication, the Medical Permission and Instructions Form (BCA-1243) must be filled out completely by the parent indicating the dosage, times given per day, and the number of days to be given.

A corrective action plan was requested and approved on 10/14/2022. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care group home (capacity 7-12).
