III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the onsite inspection there were two children present. Today they worked on their color of the week. They had oatmeal and milk for breakfast. Technical Assistance was provided regarding establishing a policy for volunteers, having a plastic lined can designated for diapers, having an abuse and neglect statement in the file, and ensuring there is nothing within 4 feet of the furnace.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1923 Diapering and toilet learning.

(2) The designated changing area must comply with all of the following:

(e) Be cleaned and sanitized after each use.

During the onsite inspection, Ms. Peace did not use the 3-step sanitize system: wash, rinse, and sanitize.

R 400.1943 Exit requirements for each floor level used by children.

(5) All exits must be unobstructed and accessible at all times.

During the onsite inspection, Ms. Peace had a blanket and other objects obstructing the exit of her egress window.

R 400.1944 Smoke detectors; fire extinguishers.

(3) A home shall have at least 1 functioning multipurpose fire extinguisher, with a rating of 2A-10BC or larger, properly mounted not higher than 5 feet from the floor to the top of the fire extinguisher, on each floor level approved for child use.

During the onsite inspection, the fire extinguisher was sitting on a shelf and not mounted.
