No. of Children Present: 120

Inspection Report

Director Requirements	Not In Compliance
350 - Health, Safety, Comfort	**Not In Compliance**

922 KAR 2:090. Section 10. Director Requirements and Responsibilities.
(1) A director shall:
(l) Assure the health, safety, and comfort of each child;

Findings:

General: Based on interviews and review of documentation, the facility failed to provide for the health, safety, and comfort of a two-year-old child in care. During the investigation, it was found that a two-year-old child who has severe wheat and gluten food allergies was given Cheeze-It crackers for snack at approximately 5:00 p.m. on 7/2/18. The child's father arrived a few minutes after the child had consumed the Cheeze-It crackers and immediately gave him a dose of Benadryl and then transported him to the emergency department. The staff person stated when the child's father arrived, the child was showing signs of an allergic reaction. She stated the child was coughing and his face and ears were red. The staff person stated she was unaware that the child had food allergies. The Director stated the staff person who had transitioned the child to the other classroom at 5:00 p.m. forgot to take the child's lunch box that contained his snack and failed to remind the staff about the child's food allergies before she left that evening. This staff person confirmed that she forgot to take the child's lunch box when she took him to the other classroom before she left. She stated that she thought the staff were aware of his food allergies. It is important to note; the child was admitted to UK Children's Hospital overnight for observation due to possible anaphylaxis.
