Findings: General: Based on observation and interview, this regulatory requirement was not met. Upon arrival (10:37AM) the surveyor entered the infant room and observed an infant asleep in a bouncy seat. The surveyor toured the infant room a second time approximately twenty minutes later and observed the child still sleeping in the same position. The staff person working in the classroom stated that the child is a light sleeper and further stated that she did not have documentation stating that the child required an alternate sleeping position.
