Inspection Report**Director Requirements****265 - Health, Safety, Comfort****Not In Compliance****922 KAR 2:110. Section 4. Director Requirements and Responsibilities.****(1) Effective with the adoption of this administrative regulation, a director shall:****(l) Provide for the health, safety, and comfort of each child;****Findings:**

Based on interviews, a three year old child received an injury to his right pointer finger in the two year olds' room at approximately 4:50 pm on 12/18/15. One caregiver was in the adjacent room, which was divided by a half wall, and observed a two year old child opening and closing the half door between the two (2) rooms but was unaware the three year old child's finger was in the hinge side of the half door. A second caregiver was in the same room with the three year old child but was not in close proximity to prevent the injury from occurring. Once the three year old child screamed, this alerted the caregiver who was in the same room with the three year old child. This caregiver walked toward the three year old child and observed the three year old child's finger inside the hinge side of the door as the two year old child opened and closed the half door. The two year old child opened and closed the door two (2) to three (3) times before the caregiver reached the children to intervene. Both caregivers immediately responded but the three year old child sustained an approximate inch wide, deep cut in the first crease of his right pointer finger. Medical treatment at the local emergency room was sought and 11 stitches were required to close the cut. An interview revealed physical therapy may be required in order for the three year old child to bend his finger again. These two (2) children were within scope of vision and range of voice.
