Findings:

General: Based on Interview, it was found that on 6/19/15 an eight (8) month old child was fed another child's formula bottle. The bottles were properly labeled and the staff person working in the classroom at the time had a form signed in her file acknowledging that she had been trained on proper procedures for bottle feeding; however, proper procedures were not followed. The child consumed the entire bottle. The staff person was not aware of the incident until the parent arrived to pick up the child and found a bottle that did not belong to the child in the child's diaper bag.
