| <b>Findings:</b><br>General: Based on interview and review of documentation, the surveyor found that an infant was sleeping in a Leap Lounger Sleeping Pillow on 9/10/19 when the infant was observed by staff to gasp, choke, and stop breathing for a period of a few seconds. Staff reported that the infant is two-months-old and there is no statement from a physician on file recommending an alternate sleep position for the infant. Staff stated the infant had been asleep on the pillow for no longer than ten (10) minutes. |  |                          |
