1045 - Frozen Food **Not In Compliance**

922 KAR 2:120. Section 8. Kitchen Requirements.
(5) Frozen food shall be:
(a) Kept at a temperature of zero degrees Fahrenheit or below; and
(b) Thawed:
1. At refrigerator temperatures;
2. Under cool, potable running water;
3. As part of the cooking process; or
4. By another method in accordance with the Department for Public Health's food safety standards and permits, established in KRS Chapter 217.

Findings:

General: Based on observation during a tour of the kitchen, the surveyor found the thermometer located in a freezer had a temperature reading of nine (9) degrees Fahrenheit; therefore, the frozen food was not kept at the required temperature reading of zero (0) degrees Fahrenheit or below. Staff added an additional thermometer in order to see if the thermometer was defective or if the temperature reading was correct. Staff stated they would continue to check the temperature of the freezer to ensure that the temperature is zero (0) degrees Fahrenheit or below.
