General: Based on observation and interview, a four (4) year old boy was observed on a cot with a four (4) year old girl. A blanket covered the boy's head and the lower part of the girl's body at approximately 1:30 p.m. on 11/14/14, in classroom E. The boy was straddled the girl on her cot and was licking her buttock area with his tongue. The supervising caregiver hired on 3/20/14, stated the two (2) children seldom took naps; therefore, she gave them a toy to play with on their cots and then she prepared the tables for children's afternoon snack by cleaning the tables. The caregiver glanced around the room and the children were on their own cot. The caregiver continued to prepare the tables with her back to the children. When she looked around the room again, she observed the boy was not on his cot. The caregiver walked to the boy's cot observed the blanket covered his head and the lower half of the girl's bottom. The caregiver pulled the blanket off the boy's head and observed the four (4) year old girl was lying on her stomach with her pants down and her bottom exposed. The caregiver pulled the boy up and told the girl to get up and pull up her pants.
