*Maximum Group Size shall be applicable only to Type I centers.

Inspection Report**Director Requirements****118 - Health, Safety, Comfort****Not In Compliance****922 KAR 2:110 - Section 4 (1)****(1) Provide for the health, safety, and comfort of each child;****Findings:**

General: Based on Observation, the surveyor found that air conditioning unit was not working in suite number four (4). The staff person in charge stated that the air conditioning unit stopped working last Monday (7/9/12). She stated that she contacted the owner of the building regarding the air conditioning unit and was assured that the unit would be fixed. However; on 7/17/12, the surveyor found that the temperature was between eighty four (84) and ninety (90) degrees. The temperature was checked with a calibrated thermometer and the thermostat was checked. There were eight (8) two (2) year old children present at the time of the inspection. Since the temperature of the suite was above eighty two (82) this was found to be a health, safety, and comfort issue for the children present.

General Premises**212 - Building Temperature****922 KAR 2:120 - Section 4****(15) The temperature of the inside area of the premises shall be:**

- (a) Sixty-five (65) to seventy-five (75) degrees Fahrenheit during the winter; or**
(b) Sixty-eight (68) to eighty-two (82) degrees Fahrenheit during the summer months.

2) Summer Temperature sixty-eight to eighty-two**Not In Compliance****Findings:**

General: Based on Observation, the surveyor found that the temperature of suite number four (4) to be eighty four (84) degrees Fahrenheit per the calibrated thermometer. The thermostat's gauge was not registering an exact temperature. The staff person in charge stated that the "little red gauge" was usually noticeable but today it was not so therefore; it had to be at least ninety (90) degrees.
