The time-out chair was behind the classroom door and when a summer program child opened the door to speak to the two (2) caregivers the child placed her fingers between the door frame and the door on the hinged side. The summer program child closed the door and the child had the nail of her right middle finger crushed. The child was taken to the emergency room by a parent where two (2) holes were drilled into the nail to release the pressure from the build up of blood.
