Findings:

General: Based on Observation, while touring the infant room an infant was observed sleeping in a bouncy seat. The infant had on a jacket with the hood pulled up on their head. Interviews found that the infant is two-months-old. A review of the sign-in sheets found that the child arrived at the facility at 8:00 a.m. An interview with the staff person in the room confirmed that the child was placed in the bouncy seat upon arrival at 8:00 a.m. Let it be noted that the surveyor arrived at the facility at 9:06 a.m. Therefore the child had been sleeping in the bouncy seat for approximately one (1) hour.
