350 - Health, Safety, Comfort	Not In Compliance
922 KAR 2:090. Section 10. Director Requirements and Responsibilities. (1) A director shall: (l) Assure the health, safety, and comfort of each child;	
Findings: General: Based on observation and review of documentation, a five (5) year old child was taken into an isolation room after showing aggressive behavior towards another child. There was a video camera in this isolation room. A review of video footage found the staff person was sitting in the isolation room with the child when he began to climb on a table and appeared to try and bite and get aggressive towards the staff person. The staff person opened the door and stepped partially out into the hallway to ask another staff person to contact the child's father. At that time the child grabbed the staff persons arm and appeared to try and bite the staff person. The staff person reacted and pushed the child off of her causing the child to fall backwards and land on the floor against a chair. The child is then seen grabbing his head. Through interview with staff, it was found that the child received a bump on his head. It should be noted that the child has a shunt in his head due to a medical condition. The child was taken to the hospital a few days after the incident due to an illness not related to this incident. During that visit the doctor was informed about the incident where the child hit his head so an x-ray was completed. It was reported that there were no injuries from the fall.
